## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 16, and 20, drawn to determining a condition for processing an image, classified in class 348, subclass 223.1.
- II. Claims 6-10, 17, and 21, drawn to determining a condition for outputting an image, classified in class 348, subclass 207.2.
- III. Claims 11-15, 18, and 19, drawn to determining a condition for inputting an image, classified in class 348, subclass 345.

Inventions of Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups I, II, and III have separate utilities such as:

Group I does not require the determination of a condition for outputting or inputting an image, as required by Groups II and III, respectively, in order to determine a condition for processing an image.

Group II does not require the determination of a condition for processing or inputting an image, as required by Groups I and III, respectively, in order to determine a condition for outputting an image.

Art Unit: 2697

Group III does not require the determination of a condition for processing or outputting an image, as required by Groups I and II, respectively, in order to determine a condition for inputting an image.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement by traversed (37 CFR 1.143).
